

Nurse Review Incorporated understands the unique challenges facing international nurses wishing to practice in the United States. We provide a comprehensive NCLEX-RN review that has enabled our students to achieve a 91% first-time pass rate on the NCLEX-RN exam. Our goal at Nurse Review Inc is to empower our students with the confidence and skills necessary to pass the NCLEX-RN and achieve licensure in the United States.

Our comprehensive NCLEX-RN review course includes all fundamental nursing principals with a strong emphasis on frequently tested concepts and the development of critical-thinking skills.

Our strategy is a dynamic mix of:

- live NCLEX-RN review lecture
- individual tutoring
- group quiz-sessions
- computer-simulated testing
- guided individual study.

Students also are familiarized with the multiple-choice-question format and exam-taking strategies necessary to excel on the current NCLEX-RN.

Succeeding on the NCLEX-RN examination is not just about knowledge of nursing, but instead about the integration and application of that knowledge in the clinical setting. We give our students the skills to think critically and to apply their knowledge in real-life situations, so that they can succeed not only on the exam but also in their future careers. Your success is our success!
